Profile

I am a **front-end developer** and **designer** with a passion for creating entertaining and engaging user experiences. I started learning coding in summer 2022, and enjoy bringing interesting designs to life. Currently looking for a junior front-end developer position to grow with the company and develop my skills.

Currently on work visa (技術・人文知識・国際業務ビザ)

Projects

TabiNow

A web app to easily generate and customize itineraries.

- Role: **Front-end Lead**
- Created wireframes, mockups, and prototypes with Figma to develop the foundation of the frontend, and designed the web interface for the application.
- Worked with backend developers and used HTML, Sass, JavaScript, RESTful API and Ruby on Rails to develop a fully functional website.
- <https://tabinow.tours/> 📄

MinaNoka

Rent or rent out farming fields to experience life in inaka.

- Role: **Lead developer**
- Worked with a team of four to build a marketplace web app.
- Review pull requests on Github.
- Used HTML, CSS, JavaScript, Ruby on Rails and Mapbox to develop a fully functional website.
- <https://github.com/joycehwchan/minanoka> 📄

OnTrack

Find the right mentor to help you get your career on track.

- Role: **UX designer**
- Conduct interviews and research
- Digital wire-framing
- Create low and high fidelity prototyping
- Conduct usability studies
- Iterate on designs and responsive design
- Prototype: shorturl.at/ryCE3 📄
